Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

<b>Application No.</b> 09/808,034	<b>Applicant(s)</b> TOMIYASU ET AL.	
<b>Examiner</b> Elizabeth M. Cole	<b>Art Unit</b> 1771	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1)  Responsive to communication(s) filed on 29 September 2005.
- 2a)  This action is **FINAL**.
- 2b)  This action is non-final.
- 3)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/29/05 has been entered.

***Claim Rejections - 35 USC § 112***

2. Applicant's helpful discussion of figure 2 of the instant application is sufficient to overcome the 112 1<sup>st</sup> paragraph rejection.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Campbell et al, U.S. Patent No. 3,842,437 in view of Yabu, U.S. Patent No. 4,507,343 as set forth the previous action. With regard to the limitations that the spaced apart nubs extend obliquely to the longitudinal direction of the fabric, Yabu teaches forming a leno weave so that it comprises yarns which form a pile, (i.e. nubs), which extend obliquely to the longitudinal direction of the fabric in order to improve the anti-slipping

Art Unit: 1771

capacity of the fabric. See figure 1 as well as col. 2, lines 60-65. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have formed the leno weave of Campbell to have the structure of Yabu with the pile extending obliquely to the longitudinal direction of the fabric, motivated by the expectation that this would enhance the anti-slipping capacity of the Campbell fabric as taught by Yabu.

5. Applicant's arguments filed 9/29/05 have been fully considered but they are not persuasive. Applicant argues that Campbell does not teach nubs which are oblique to the longitudinal direction of the fabric. However, as set forth above, since Yabu teaches this feature for the purpose of enhancing slip resistance, it would have been obvious to have formed the leno weave of Campbell so that it had the oblique nubs taught by Yabu.
